

CLASS[®] Calibrations & Double Coding

Build Observer Confidence and Precision

Give CLASS Observers the edge they need to ensure consistent, reliable CLASS observations.

**Enhance
Observer
Confidence**

**Refine
Observation
Skills**

**Maintain Data
Integrity &
Reliability**

Protect Your CLASS Investment with:

CLASS Calibrations

Individual or Group Calibrations allows certified observers to practice observing in between formal observations. Observers watch videos featuring real classroom settings, score the interactions, and receive instant feedback on the scores assigned.

CLASS Double Coding

Double Coding provides the most authentic practice experience with observations in your own setting. Your certified observers team up with a Teachstone expert coder to jointly observe, score, and debrief. This personalized approach includes observer coaching for an enriched learning experience.

Boost observer confidence, maintain data integrity, and ensure the highest quality interactions for every child!
