

CLASS Environment™

Measure Quality with One System

CLASS Environment is the essential companion for any CLASS® observation. It simplifies the quality assessment process and empowers educators to create enriching learning environments where quality interactions can thrive. Effortlessly measure and improve both the physical setting and educator-child interactions, all in one system.

With CLASS Environment you can:

Gain a comprehensive picture of classroom quality

Reduce time and cost associated with observations

Boost educator confidence and effectiveness

Streamline data collection and reporting processes

Create environments that promote children's learning

CLASS Environment Observer Training

This 5-hour, self-paced online course equips certified CLASS observers to effectively evaluate key classroom environment elements, promoting optimal educator-child interactions.

CLASS Environment Educator Overview

This 3-hour self-paced online course empowers educators to harness the classroom environment's potential, enhancing the quality of educator-child interactions for every child.

**CLASS Environment supports infant-toddler and Pre-K-K*

Create an environment for interactions to flourish

Move beyond measurement, and capture a comprehensive picture of your program quality to make data-driven improvements to both the learning environment and educator-child interactions.
