

# SCIENCE CLUB

Science Club is an exclusive teacher Community of Practice (CoP) where teachers from all over the country get to see how science is implemented in other classrooms. Experiences and conversations are provoked through unique materials mailed directly to your classroom along with resource cards that inspire ways to excite children and engage families in culturally and contextually relevant ways.

For the cost of \$250, you will receive:

- access to an introductory webinar
- 6 provocations mailed directly to you
- unique ESI resource materials
- invitation to 6 Communities of Practice
- access to our private Facebook group
- Up to 10 hours of professional development clock hours

Sign up now for our next session that begins this September at [earlyscienceinitiative.org](http://earlyscienceinitiative.org)
